

### **3.2.2 ECOSYSTEM FOR INNOVATIONS AND HAS INITIATIVES FOR CREATION AND TRANSFER OF KNOWLEDGE**

- The COVID-19 pandemic has resulted in the closure of the colleges across the country. Education system has changed significantly during this lockdown period. In this pandemic, our institution had hosted virtual online classes through different platforms like google classroom, google meet and zoom meetings. You tube videos were also prepared both for the theory and practical classes.
- We also used **Learning Management System (LMS)** tool for delivering and managing online classes. We have used '**Great Learning**' and '**Google Classroom**' LMS for virtual classes.
- In this system we can take attendance, track the online assignment and overall students progress. This online classroom has become a boon for the teachers as MCQ, True-false, fill-in-the-blanks type questions can be checked automatically without any hassle.
- The marks file can be downloaded from the export csv. option in the form of excel sheet and can be easily documented. Students also can take part in discussion. Here, students can post quires to teachers, access online study materials easily.
- Students can easily view the recorded classes and resolve the doubts. Along with this, official **email system** and **Whatsapp official groups** are also made for doubt clearing of the students.
- **Ebooks** were provided by the respective subject teachers to both UG and PG students. Various review and research articles were also provided to postgraduate students so that they can refer them.
- **Seminars and Journal clubs** were arranged for Post graduate students on a weekly basis. **Webinars** are also arranged from time to time for knowledge enrichment.
- Further, free online classes for competitive examination GPAT, are conducted on a regular basis along with exams so that their progress can be monitored. Finally, grooming and soft skill classes are organized through Google meet platform for the B.Pharm and M.Pharm final year students so that they can perform well in interviews and get placed in good companies.
